The only time I have available next week is Wed before noon or (maybe) Thur morning. But, I haven't had time to look at the Appendix H materials that arrived last week. Also, because Burt is now taking the lead on the FW modeling effort, I think it critical he be on the call as well (and have had time to look at the materials too).

Subject: LWR FWM parameterization

Bruce, Carrie, and Eric,

The LWG is still hoping to keep our target schedule of doing some F&T-FWM runs by the end of January. There are still some issues related to the FWM parameterization and recent code changes that we'd like to resolve.

We have sent through the parameterization we used for application of the model for iPRG development and have reviewed the new dynamic version of the FWM. We received a response from Bruce on some of our questions related to the model changes but some remain and the parameterization needs to be resolved. The most efficient way to deal with these issues might be a conference call. Is there a time next week (Jan 16th - 19th- maybe a 2 hour block) that would work for you? Thanks, Nancy

Nancy Judd
